G70-B GENERAL PERMIT REGISTRATION APPLICATION

PREVENTION AND CONTROL OF AIR POLLUTION IN REGARD TO THE CONSTRUCTION, MODIFICATION, RELOCATION, ADMINISTRATIVE UPDATE AND OPERATION OF

NATURAL GAS PROD	OUCTION FACIL	ITIES LOCATED AT THE WE	LL SITE						
\Box CONSTRUCTION		□CLASS I ADMINISTRATIVE UPDATE							
\square MODIFICATION	□CLASS II ADMINISTRATIV	LASS II ADMINISTRATIVE UPDATE							
□RELOCATION									
SE	SECTION 1. GENERAL INFORMATION								
Name of Applicant (as registered with the V	VV Secretary of St	tate's Office):							
Federal Employer ID No. (FEIN):									
Applicant's Mailing Address:									
City:	State:		ZIP Code:						
Facility Name:									
Operating Site Physical Address: If none available, list road, city or town and	l zip of facility.								
City:	Zip Code:		County:						
Latitude & Longitude Coordinates (NAD83 Latitude: Longitude:	, Decimal Degrees	to 5 digits):							
SIC Code:		DAQ Facility ID No. (For exist	ing facilities)						
NAICS Code:									
C	ERTIFICATION (OF INFORMATION							
This G70-B General Permit Registration Official is a President, Vice President, Sec Directors, or Owner, depending on business authority to bind the Corporation, Pa Proprietorship. Required records of dai compliance certifications and all requires Representative. If a business wishes to cert off and the appropriate names and sign unsigned G70-B Registration Application utilized, the application will be	retary, Treasurer, structure. A busing the structure. It is the structure of the structure	General Partner, General Manage ness may certify an Authorized Ro Liability Company, Association, ars of operation and maintenance, nust be signed by a Responsible O Representative, the official agree by administratively incomplete of	r, a member of the Board of epresentative who shall have Joint Venture or Sole general correspondence, fficial or an Authorized ment below shall be checked r improperly signed or if the G70-B forms are not						
I hereby certify that is an Authorized Representative and in that capacity shall represent the interest of the business (e.g., Corporation, Partnership, Limited Liability Company, Association Joint Venture or Sole Proprietorship) and may obligate and legally bind the business. If the business changes its Authorized Representative, a Responsible Official shall notify the Director of the Division of Air Quality immediately. I hereby certify that all information contained in this G70-B General Permit Registration Application and any supporting documents appended hereto is, to the best of my knowledge, true, accurate and complete, and that all reasonable efforts have been made to provide the most comprehensive information possible.									
Responsible Official Signature:	Phone: Date:	Fax:							
If applicable: Authorized Representative Signature: Name and Title: Email:	Phone: Date:	Fax:							
If applicable: Environmental Contact Name and Title: Email:	Phone: Date:	Fax:							

OPERATING SITE INFORMATION								
Briefly describe the proposed new operation and/or any change	ge(s) to the facility:							
Directions to the facility:								
ATTACHMENTS AND SU	PPORTING DOCUMENTS							
I have enclosed the following required documen	ts:							
Check payable to WVDEP - Division of Air Quality with the	Check payable to WVDEP – Division of Air Quality with the appropriate application fee (per 45CSR13 and 45CSR22).							
 □ Check attached to front of application. □ I wish to pay by electronic transfer. Contact for payment (incl. name and email address): □ I wish to pay by credit card. Contact for payment (incl. name and email address): 								
□\$500 (Construction, Modification, and Relocation) □\$300 (Class II Administrative Update) □\$1,000 NSPS fee for 40 CFR60, Subpart IIII, JJJJ and/or OOOO ¹ □\$2,500 NESHAP fee for 40 CFR63, Subpart ZZZZ and/or HH ²								
¹ Only one NSPS fee will apply. ² Only one NESHAP fee will apply. The Subpart ZZZZ NESHAP fee will be waived for new engines that satisfy requirements by complying with NSPS, Subparts IIII and/or JJJJ. NSPS and NESHAP fees apply to new construction or if the source is being modified.								
☐ Responsible Official or Authorized Representative Signatu	are (if applicable)							
☐ Single Source Determination Form (must be completed in	its entirety) - Attachment A							
☐ Siting Criteria Waiver (if applicable) – Attachment B	☐ Current Business Certificate – Attachment C							
☐ Process Flow Diagram – Attachment D	☐ Process Description – Attachment E							
☐ Plot Plan - Attachment F	☐ Area Map – Attachment G							
☐ G70-B Section Applicability Form – Attachment H	☐ Emission Units/ERD Table – Attachment I							
☐ Fugitive Emissions Summary Sheet – Attachment J								
☐ Gas Well Affected Facility Data Sheet (if applicable) – At	tachment K							
☐ Storage Vessel(s) Data Sheet (include gas sample data, US HYSYS, etc.), etc. where applicable) – Attachment L	EPA Tanks, simulation software (e.g. ProMax, E&P Tanks,							
☐ Natural Gas Fired Fuel Burning Unit(s) Data Sheet (GPUs. M	, Heater Treaters, In-Line Heaters if applicable) - Attachment							
☐ Internal Combustion Engine Data Sheet(s) (include manufa N	acturer performance data sheet(s) if applicable) - Attachment							
☐ Tanker Truck Loading Data Sheet (if applicable) - Attach	ment O							
☐ Glycol Dehydration Unit Data Sheet(s) (include wet gas analysis, GRI- GLYCalc TM input and output reports and information on reboiler if applicable) – Attachment P								
☐ Pneumatic Controllers Data Sheet – Attachment Q								
☐ Air Pollution Control Device/Emission Reduction Device(applicable) – Attachment R	s) Sheet(s) (include manufacturer performance data sheet(s) if							
☐ Emission Calculations (please be specific and include all c	calculation methodologies used) - Attachment S							
☐ Facility-wide Emission Summary Sheet(s) – Attachment T								
☐ Class I Legal Advertisement – Attachment U								
☐ One (1) paper copy and two (2) copies of CD or DVD with pdf copy of application and attachments								

All attachments must be identified by name, divided into sections, and submitted in order.

ATTACHMENT A - SINGLE SOURCE DETERMINATION FORM

Classifying multiple facilities as one "stationary source" under 45CSR13, 45CSR14, and 45CSR19 is based on the definition of Building, structure, facility, or installation as given in §45-14-2.13 and §45-19-2.12. The definition states:

"Building, Structure, Facility, or Installation" means all of the pollutant-emitting activities which belong to the same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the

same industrial grouping, are located on one or more contiguous or adjacent properties, and are under the control of the same person (or persons under common control). Pollutant-emitting activities are a part of the same industrial grouping if they belong to the same "Major Group" (i.e., which have the same two (2)-digit code) as described in the Standard Industrial Classification Manual, 1987 (United States Government Printing Office stock number GPO 1987 0-185-718:QL 3).
Is there a facility owned by or associated with the natural gas industry located within one (1) mile of the proposed facility? Yes \Box No \Box
If Yes, please complete the questionnaire on the following page (Attachment A).
Please provide a source aggregation analysis for the proposed facility below:

ATTACHMENT A - SINGLE SOURCE DETERMINATION FORM

Answer each question with a detailed explanation to determine contiguous or adjacent properties which are under a common control and any support facilities. This section must be completed in its entirety.

Provide a map of contiguous or adjacent facilities (production facilities, compressor stations, dehydration facilities, etc.) which are under common control and those facilities that are not under common control but are support facilities. Please indicate the SIC code, permit number (if applicable), and the distance between facilities in question on the map. Are the facilities owned by the same parent company or a subsidiary of the parent company? Yes □ Provide the owners identity and the percentage of ownership of each facility. No □ Does an entity such as a corporation have decision making authority over the operation of a second entity through a contractual agreement or voting interest? Please explain. Yes \square No □ Is there a contract for service relationship between the two (2) companies or, a support/dependency relationship that exists between the two (2) companies? Please explain. Yes \square No □ Do the facilities share common workforces, plant managers, security forces, corporate executive Yes \square No □ officers or board executives? Will managers or other workers frequently shuttle back and forth to be involved actively at both Yes \square No □ facilities? Do the facilities share common payroll activities, employee benefits, health plans, retirement funds, insurance coverage, or other administrative functions? Please explain. Yes \square No □ Does one (1) facility operation support the operation of the other facility? Yes \square No □ Is one (1) facility dependent on the other? If one (1) facility shuts down, what are the limitations on the other to pursue outside business? Please explain. Yes \square No □ Are there any financial arrangements between the two (2) entities? Yes \square No □ Are there any legal or lease agreements between the two (2) facilities? Yes \square No □ Do the facilities share products, byproducts, equipment, or other manufacturing or air pollution Yes \square No \square control device equipment? Please explain. Do all the pollutant-emitting activities at the facilities belong to the same SIC Code? Please provide the SIC Codes. Yes \square No □ Was the location of the new facility chosen primarily because of its proximity to the existing facility to integrate the operation of the two (2) facilities? Please explain. Yes \square No 🗆 Will materials be routinely transferred between the two (2) facilities? Please explain the amount of transfer and how often the transfers take place and what percentages go to the various entities. Yes \square No □ Does the facility influence production levels or compliance with environmental regulations at other facilities? Who accepts the responsibility for compliance with air quality requirements? Yes \square No □

Please explain.

ATTACHMENT B - SITING CRITERIA WAIVER

If applicable, please complete this form and it must be notarized.

ATTACHMENT C – CURRENT BUSINESS CERTIFICATE

If the applicant is a resident of West Virginia, the applicant should provide a copy of the current Business Registration Certificate issued to them from the West Virginia Secretary of State's Office. If the applicant is not a resident of the State of West Virginia, the registrant should provide a copy of the Certificate of Authority/Authority of LLC/Registration. This information is required for all sources to operate a business in West Virginia regardless of whether it is a construction, modification, or administrative update.

If you are a new business to West Virginia and have applied to the West Virginia Secretary of State's Office for a business license, please include a copy of your application.

Please note: Under the West Virginia Bureau of Employment Programs, 96CSR1, the DAQ may not grant, issue, or renew approval of any permit, general permit registration, or Certificate to Operate to any employing unit whose account is in default with the Bureau of Employment Programs Unemployment Compensation Division.

ATTACHMENT D - PROCESS FLOW DIAGRAM

Provide a diagram or schematic that supplements the process description of the operation. The process flow diagram must show all sources, components or facets of the operation in an understandable line sequence of operation. The process flow diagram should include the emission unit ID numbers, the pollution control device ID numbers, and the emission point ID numbers consistent with references in other attachments of the application. For a proposed modification, clearly identify the process areas, emission units, emission points, and/or control devices that will be modified, and specify the nature and extent of the modification.

Use the following guidelines to ensure a complete process flow diagram:

- The process flow diagram shall logically follow the entire process from beginning to end.
- Identify each emission source and air pollution control device with proper and consistent emission unit identification numbers, emission point identification numbers, and control device identification numbers.
- The process flow lines may appear different for clarity. For example, dotted lines may be used for vapor flow and solid lines used for liquid flow and arrows for direction of flow.
- The process flow lines may be color coded. For example: new or modified equipment may be red; old or existing equipment may be blue; different stages of preparation such as raw material may be green; and, finished product or refuse, another color.

ATTACHMENT E – PROCESS DESCRIPTION

Provide a detailed written description of the operation for which the applicant is seeking a permit. The process description is used in conjunction with the process flow diagram to provide the reviewing engineer a complete understanding of the activity at the operation. Describe in detail and order the complete process operation.

Use the following guidelines to ensure a complete Process Description:

- The process flow diagram should be prepared first and used as a guide when preparing the process description. The written description shall follow the logical order of the process flow diagram.
- All emission sources, emission points, and air pollution control devices must be included in the process description.
- When modifications are proposed, describe the modifications and the effect the changes will have on the emission sources, emission points, control devices and the potential emissions.
- Proper emission source ID numbers must be used consistently in the process description, the process flow diagram, the emissions calculations, and the emissions summary information provided.
- Include any additional information that may facilitate the reviewers understanding of the process operation.

The process description is required for all sources regardless of whether it is a construction, modification, or administrative update.

ATTACHMENT F - PLOT PLAN

Provide an accurately scaled and detailed Plot Plan showing the locations of all emission units, emission points, and air pollution control devices. Show all emission units, affected facilities, enclosures, buildings and plant entrances and exits from the nearest public road(s) as appropriate. Note height, width and length of proposed or existing buildings and structures.

A scale between 1"=10' and 1"=200' should be used with the determining factor being the level of detail necessary to show operation or plant areas, affected facilities, emission unit sources, transfer points, etc. An overall small scale plot plan (e.g., 1"=300') should be submitted in addition to larger scale plot plans for process or activity areas (e.g., 1"=50') if the plant is too large to allow adequate detail on a single plot plan. Process or activity areas may be grouped for the enlargements as long as sufficient detail is shown.

Use the following guidelines to ensure a complete Plot Plan:

- Facility name
- Company name
- Company facility ID number (for existing facilities)
- Plot scale, north arrow, date drawn, and submittal date.
- Facility boundary lines
- Base elevation
- Lat/Long reference coordinates from the area map and corresponding reference point elevation
- Location of all point sources labeled with proper and consistent source identification numbers

This information is required for all sources regardless of whether it is a construction, modification, or administrative update.

ATTACHMENT G - AREA MAP

Provide an Area Map showing the current or proposed location of the operation. On this map, identify plant or operation property lines, access roads and any adjacent dwelling, business, public building, school, church, cemetery, community or institutional building or public park within a 300' boundary circle of the collective emission units.

Please provide a 300' boundary circle on the map surrounding the proposed emission units collectively.

This information is required for all sources regardless of whether it is a construction, modification, or administrative update.

ATTACHMENT H - G70-B SECTION APPLICABILITY FORM

General Permit G70-B Registration Section Applicability Form

General Permit G70-B was developed to allow qualified applicants to seek registration for a variety of sources. These sources include gas well affected facilities, storage vessels, gas production units, in-line heaters, heater treaters, glycol dehydration units and associated reboilers, pneumatic controllers, centrifugal compressors, reciprocating compressors, reciprocating internal combustion engines (RICEs), tank truck loading, fugitive emissions, completion combustion devices, flares, enclosed combustion devices, and vapor recovery systems. All registered facilities will be subject to Sections 1.0, 2.0, 3.0, and 4.0.

General Permit G70-B allows the registrant to choose which sections of the permit they are seeking registration under. Therefore, please mark which additional sections that you are applying for registration under. If the applicant is seeking registration under multiple sections, please select all that apply. Please keep in mind, that if this registration is approved, the issued registration will state which sections will apply to your affected facility.

G	ENERAL PERMIT G70-B APPLICABLE SECTIONS
□Section 5.0	Gas Well Affected Facility (NSPS, Subpart OOOO)
□Section 6.0	Storage Vessels Containing Condensate and/or Produced Water ¹
□Section 7.0	Storage Vessel Affected Facility (NSPS, Subpart OOOO)
□Section 8.0	Control Devices and Emission Reduction Devices not subject to NSPS Subpart OOOO and/or NESHAP Subpart HH
□Section 9.0	Small Heaters and Reboilers not subject to 40CFR60 Subpart Dc
□Section 10.0	Pneumatic Controllers Affected Facility (NSPS, Subpart OOOO)
□Section 11.0	Centrifugal Compressor Affected Facility (NSPS, Subpart OOOO) ²
□Section 12.0	Reciprocating Compressor Affected Facility (NSPS, Subpart OOOO) ²
□Section 13.0	Reciprocating Internal Combustion Engines, Generator Engines, Microturbines
□Section 14.0	Tanker Truck Loading ³
□Section 15.0	Glycol Dehydration Units ⁴

- 1 Applicants that are subject to Section 6 may also be subject to Section 7 if the applicant is subject to the NSPS, Subpart OOOO control requirements or the applicable control device requirements of Section 8.
- 2 Applicants that are subject to Section 11 and 12 may also be subject to the applicable RICE requirements of Section 13.
- 3 Applicants that are subject to Section 14 may also be subject to control device and emission reduction device requirements of Section 8.
- 4 Applicants that are subject to Section 15 may also be subject to the requirements of Section 9 (reboilers). Applicants that are subject to Section 15 may also be subject to control device and emission reduction device requirements of Section 8.

ATTACHMENT I – EMISSION UNITS / EMISSION REDUCTION DEVICES (ERD) TABLE

Include ALL emission units and air pollution control devices/ERDs that will be part of this permit application review. Do not include fugitive emission sources in this table. Deminimis storage tanks shall be listed in the Attachment L table. This information is required for all sources regardless of whether it is a construction, modification, or administrative update.

Emission Unit ID ¹	Emission Point ID ²	Emission Unit Description	Year Installed	Manufac. Date ³	Design Capacity	Type ⁴ and Date of Change	Control Device(s) ⁵	ERD(s) ⁶

¹ For Emission Units (or Sources) use the following numbering system:1S, 2S, 3S,... or other appropriate designation.

² For Emission Points use the following numbering system:1E, 2E, 3E, ... or other appropriate designation.

³ When required by rule

⁴ New, modification, removal, existing

⁵ For Control Devices use the following numbering system: 1C, 2C, 3C,... or other appropriate designation.

⁶ For ERDs use the following numbering system: 1D, 2D, 3D,... or other appropriate designation.

	ATTACHMENT J – FUGITIVE EMISSIONS SUMMARY SHEET									
	Sources of fugitive emissions may include loading operations, equipment leaks, blowdown emissions, etc. Use extra pages for each associated source or equipment if necessary.									
	Source/Equipment:									
	Leak Detection Method Used	n	☐ Audible, visual, and olfactory (AVO) inspections	☐ Infrared (FLIR) cameras	☐ Other (please	☐ None required				
Compone	ent Closed		Source of	Leak Factors	Stream type		Estimated Emi	ssions (tpy)		
Туре	Vent System	Count	(EPA, oth	ner (specify))	(gas, liquid, etc.)	VOC	HAP	GHG (CO ₂ e)		
Pumps	☐ Yes ☐ No				☐ Gas ☐ Liquid ☐ Both					
Valves	☐ Yes ☐ No				☐ Gas ☐ Liquid ☐ Both					
Safety Rel Valves	ief ☐ Yes ☐ No				☐ Gas ☐ Liquid ☐ Both					
Open Ende Lines	ed ☐ Yes ☐ No				☐ Gas ☐ Liquid ☐ Both

Compresso	□ Yes □ No				☐ Gas ☐ Liquid ☐ Both					
Flanges	☐ Yes ☐ No				☐ Gas ☐ Liquid ☐ Both					
Other ¹	□ Yes □ No □ Liquid □ Both									
			compressor seals, relief valves, o							
Please provide an explanation of the sources of fugitive emissions (e.g. pigging operations, equipment blowdowns, pneumatic controllers, etc.):										

Please indicate if there are any closed vent bypasses (include component):							
Specify all equipment used in the closed vent system (e.g. VRU, ERD, thief hatches, tanker truck loading, etc.)							

ATTACHMENT K – GAS WELL AFFECTED FACILITY DATA SHEET

Complete this data sheet if you are the owner or operator of a gas well affected facility for which construction, modification or reconstruction commenced after August 23, 2011. This form must be completed for natural gas well affected facilities regardless of when flowback operations occur (or have occurred).

API Number	Date of Flowback	Date of Well Completion	Green Completion and/or Combustion Device

Note: If future wells are planned and no API number is available please list as PLANNED.

If there are existing wells that commenced construction prior to August 23, 2011, please acknowledge as existing.

This is the same API (American Petroleum Institute) well number(s) provided in the well completion notification and as provided to the WVDEP, Office of Oil and Gas for the well permit. The API number may be provided on the application without the state code (047).

Every oil and gas well permitted in West Virginia since 1929 has been issued an API number. This API is used by agencies to identify and track oil and gas wells.

The API number has the following format: 047-001-00001

Where,

047 = State code. The state code for WV is 047.

001 = County Code. County codes are odd numbers, beginning with 001

(Barbour) and continuing to 109 (Wyoming).

00001= Well number. Each well will have a unique well number.

ATTACHMENT L - STORAGE VESSEL DATA SHEET

Complete this data sheet if you are the owner or operator of a storage vessel that contains condensate and/or produced water. This form must be completed for *each* new or modified bulk liquid storage vessel(s) that contains condensate and/or produced water. (If you have more than one (1) identical tank (i.e. 4-400 bbl condensate tanks), then you can list all on one (1) data sheet). Include gas sample analysis, flashing emissions, working and breathing losses, USEPA Tanks, simulation software (ProMax, E&P Tanks, HYSYS, etc.), and any other supporting documents where applicable.

simulation software (ProMax, E&P Tanks, HYSYS, etc.), and any other supporting documents where applicable.							
The following information is REQUIRED:							
 □ Composition of the representative sample used for the simulation □ For each stream that contributes to flashing emissions: □ Temperature and pressure (inlet and outlet from separator(s)) □ Simulation-predicted composition □ Molecular weight □ Flow rate □ Resulting flash emission factor or flashing emissions from simulation □ Working/breathing loss emissions from tanks and/or loading emissions if simulation is used to quantify those emissions 							
Additional information may be requested if necessary.							

GENERAL INFORMATION (REQUIRED)

Bulk Storage Area Name	2. Tank Name				
3. Emission Unit ID number	4. Emission Point ID number				
5. Date Installed, Modified or Relocated (for existing tanks)	6. Type of change:				
	\square New construction \square New stored material \square Other				
Was the tank manufactured after August 23, 2011?	Relocation				
□ Yes □ No					
7A. Description of Tank Modification (if applicable)					
7B. Will more than one material be stored in this tank? If so, a s	separate form must be completed for each material.				
□ Yes □ No					
7C. Was USEPA Tanks simulation software utilized?					
☐ Yes ☐ No					
If Yes, please provide the appropriate documentation and items	8-42 below are not required.

inputs into flashing emission calculations.		

STORAGE TANK DATA TABLE

List all deminimis storage tanks (i.e. lube oil, glycol, diesel etc.)

Source ID # ¹	Status ²	Content ³	Volume ⁴

- Enter the appropriate Source Identification Numbers (Source ID #) for each storage tank located at the compressor station. Tanks should be designated T01, T02, T03, etc. 1.
- Enter storage tank Status using the following: EXIST Existing Equipment 2.

NEW Installation of New Equipment

REM Equipment Removed

- Enter storage tank content such as condensate, pipeline liquids, glycol (DEG or TEG), lube oil, diesel, mercaptan etc. Enter the maximum design storage tank volume in gallons. 3. 4.

ATTACHMENT M – SMALL HEATERS AND REBOILERS NOT SUBJECT TO 40CFR60 SUBPART DC DATA SHEET

Complete this data sheet for each small heater and reboiler not subject to 40CFR60 Subpart Dc at the facility. The Maximum Design Heat Input (MDHI) must be less than 10 MMBTU/hr.

Emission Unit ID# ¹	Emission Point ID# ²	Emission Unit Description (manufacturer, model #)	Year Installed/ Modified	Type ³ and Date of Change	Maximum Design Heat Input (MMBTU/hr) ⁴	Fuel Heating Value (BTU/scf) ⁵

Enter the appropriate Emission Unit (or Source) identification number for each fuel burning unit located at the production pad. Gas Producing Unit Burners should be designated GPU-1, GPU-2, etc. Heater Treaters should be designated HT-1, HT-2, etc. Heaters or Line Heaters should be designated LH-1, LH-2, etc. For sources, use 1S, 2S, 3S...or other appropriate designation. Enter glycol dehydration unit Reboiler Vent data on the Glycol Dehydration Unit Data Sheet.

Enter the appropriate Emission Point identification numbers for each fuel burning unit located at the production pad. Gas Producing Unit Burners should be designated GPU-1, GPU-2, etc. Heater Treaters should be designated HT-1, HT-2, etc. Heaters or Line Heaters should be designated LH-1, LH-2, etc. For emission points, use 1E, 2E, 3E...or other appropriate designation.

New, modification, removal

Enter design heat input capacity in MMBtu/hr.

⁵ Enter the fuel heating value in BTU/standard cubic foot.

ATTACHMENT N - INTERNAL COMBUSTION ENGINE DATA SHEET

Complete this data sheet for each internal combustion engine at the facility. Include manufacturer performance data sheet(s) or any other supporting document if applicable. Use extra pages if necessary. *Generator(s) and microturbine generator(s) shall also use this form.*

NSConstruction of New Source (installation)ESExisting SourceMSModification of Existing SourceRSRelocated Source

REM Removal of Source

¹ Enter the appropriate Source Identification Number for each natural gas-fueled reciprocating internal combustion compressor/generator engine located at the compressor station. Multiple compressor engines should be designated CE-1, CE-2, CE-3 etc. Generator engines should be designated GE-1, GE-2, GE-3 etc. Microturbine generator engines should be designated MT-1, MT-2, MT-3 etc. If more than three (3) engines exist, please use additional sheets.

- 3 Enter the date (or anticipated date) of the engine's installation (construction of source), modification, relocation or removal.
- 4 Enter the date that the engine was manufactured, modified or reconstructed.
- Is the engine a certified stationary spark ignition internal combustion engine according to 40CFR60 Subpart IIII/JJJJ? If so, the engine and control device must be operated and maintained in accordance with the manufacturer's emission-related written instructions. You must keep records of conducted maintenance to demonstrate compliance, but no performance testing is required. If the certified engine is not operated and maintained in accordance with the manufacturer's emission-related written instructions, the engine will be considered a non-certified engine and you must demonstrate compliance as appropriate.

Provide a manufacturer's data sheet for all engines being registered.

6 Enter the Engine Type designation(s) using the following codes:

2SLB Two Stroke Lean Burn 4SRB Four Stroke Rich Burn

4SLB Four Stroke Lean Burn

7 Enter the Air Pollution Control Device (APCD) type designation(s) using the following codes:

A/F Air/Fuel Ratio IR Ignition Retard

HEISHigh Energy Ignition SystemSIPCScrew-in Precombustion ChambersPSCPrestratified ChargeLECLow Emission Combustion

NSCR Rich Burn & Non-Selective Catalytic Reduction

OxCat Oxidation Catalyst

SCR Lean Burn & Selective Catalytic Reduction

8 Enter the Fuel Type using the following codes:

PQ Pipeline Quality Natural Gas RG Raw Natural Gas / Production Gas D Diesel

9 Enter the Potential Emissions Data Reference designation using the following codes. Attach all reference data used.

MD Manufacturer's Data AP AP-42

GR GRI-HAPCalcTM OT Other (please list)

- Enter each engine's Potential to Emit (PTE) for the listed regulated pollutants in pounds per hour and tons per year. PTE shall be calculated at manufacturer's rated brake horsepower and may reflect reduction efficiencies of listed Air Pollution Control Devices. Emergency generator engines may use 500 hours of operation when calculating PTE. PTE data from this data sheet shall be incorporated in the *Emissions Summary Sheet*.
- 11 PTE for engines shall be calculated from manufacturer's data unless unavailable.

ATTACHMENT O – TANKER TRUCK LOADING DATA SHEET

Complete this data sheet for each new or modified bulk liquid transfer area or loading rack at the facility. This is to be used for bulk liquid transfer operations to tanker trucks. Use extra pages if necessary.

Truck Loadout Collection Efficiencies

The following applicable capture efficiencies of a truck loadout are allowed:

- For tanker trucks passing the MACT level annual leak test 99.2%
- For tanker trucks passing the NSPS level annual leak test 98.7%
- For tanker trucks not passing one of the annual leak tests listed above 70%

Compliance with this requirement shall be demonstrated by keeping records of the applicable MACT or NSPS Annual Leak Test certification for *every* truck and railcar loaded/unloaded. This requirement can be satisfied if the trucking company provided certification that its entire fleet was compliant. This certification must be submitted in writing to the Director of the DAQ. These additional requirements must be noted in the Registration Application.

The registr	ant may claim a capture and control efficiency of 9	8% if the VI	RU has a backup VRU.							

ATTACHMENT S – EMISSIONS CALCULATIONS

Provide detailed potential to emit (PTE) emission calculations for criteria and hazardous air pollutants (HAPs) for each emission point identified in the application. For hazardous air pollutants and volatile organic compounds (VOCs), the speciated emission calculations must be included.

Use the following guidelines to ensure complete emission calculations:

- All emission sources and fugitive emissions are included in the emission calculations, as well as all methods used to calculate the emissions.
- Proper emission point identification numbers and APCD and ERD identification numbers are used consistently in the emission calculations that are used throughout the application.
- A printout of the emission summary sheets is attached to the registration application.
- Printouts of any modeling must be included with the emission calculations. The modeling printout must show all inputs/outputs or assumptions that the modeled emissions are based upon.
- If emissions are provided from the manufacturer, the manufacturer's documentation and/or certified emissions must also be included.
- The emission calculations results must match the emissions provided on the emissions summary sheet.
- If calculations are based on a compositional analysis of the gas, attach the laboratory analysis. Include the following information: the location that the sample was taken (and whether the sample was taken from the actual site or a representative site); the date the sample was taken; and, if the sample is considered representative, the reasons that it is considered representative (same gas field, same formation and depth, distance from actual site, etc.).
- Provide any additional clarification as necessary. Additional clarification or information is especially helpful when reviewing modeling calculations to assist the engineer in understanding the basis of assumptions and/or inputs.

Please follow specific guidance provided on the emissions summary sheet when providing the calculations.

ATTACHMENT T - FACILITY-WIDE CONTROLLED EMISSIONS SUMMARY SHEET List all sources of emissions in this table. Use extra pages if necessary. CO VOC NO_x SO_2 GHG (CO₂e) PM_{10} $PM_{2.5}$ Emission Point ID# lb/hr tpy lb/hr tpy lb/hr tpy lb/hr tpy lb/hr tpy lb/hr tpy lb/hr tpy

Annual emissions shall be based on 8,760 hours per year of operation for all emission units except emergency generators.

According to 45CSR14 Section 2.43.e, fugitive emissions are not included in the major source determination because it is not listed as one of the source categories in Table 1. Therefore, fugitive emissions shall not be included in the PTE above.

TOTAL

Annual emissions shall be based on 8,760 hours per year of operation for all emission units except emergency generators.

According to 45CSR14 Section 2.43.e, fugitive emissions are not included in the major source determination because it is not listed as one of the source categories in Table 1. Therefore, fugitive emissions shall not be included in the PTE above.

ATTACHMENT U – CLASS I LEGAL ADVERTISEMENT

Publication of a proper Class I legal advertisement is a requirement of the G70-B registration process. In the event the applicant's legal advertisement fails to follow the requirements of 45CSR13, Section 8 or the requirements of Chapter 59, Article 3, of the West Virginia Code, the application will be considered incomplete and no further review of the application will occur until this is corrected.

The applicant, utilizing the format for the Class I legal advertisement example provided on the following page, shall have the legal advertisement appear a minimum of one (1) day in the newspaper most commonly read in the area where the facility exists or will be constructed. The notice must be published no earlier than five (5) working days of receipt by this office of your application. The original affidavit of publication must be received by this office no later than the last day of the public comment period.

The advertisement shall contain, at a minimum, the name of the applicant, the type and location of the source, the type and amount of air pollutants that will be discharged (excluding fugitive emissions), the nature of the permit being sought, the proposed start-up date for the source, and a contact telephone number for more information.

The location of the source should be as specific as possible starting with: 1.) the street address of the source; 2.) the nearest street or road; 3.) the nearest town or unincorporated area, 4.) the county, and 5.) latitude and longitude coordinates in decimal format.

Types and amounts of pollutants discharged must include all regulated pollutants (Nitrogen Oxides, Carbon Monoxide, Particulate Matter-2.5, Particulate Matter-10, Volatile Organic Compounds, Sulfur Dioxide, Formaldehyde, Benzene, Toluene, Ethylbenzene, Xylenes, Hexane, Total Hazardous Air Pollutants and their potential to emit or the permit level being sought in units of tons per year.

In the event the 30th day is a Saturday, Sunday, or legal holiday, the comment period will be extended until 5:00 p.m. on the following regularly scheduled business day.

A list of qualified newspapers that are eligible to publish legal ads may be found:

 $http://www.sos.wv.gov/elections/resource/Documents/Qualified \%\,20 Newspapers.pdf$

RECOMMENDED PUBLIC NOTICE TEMPLATE

AIR QUALITY PERMIT NOTICE Notice of Application

Notice is given that <u>(Applicant's Legal Name)</u> has applied to the West Virginia Department of Environmental Protection, Division of Air Quality, for a G70-B <u>(General Permit Registration, General Permit Modification, General Permit Class II Administrative Update)</u> for a natural gas production facility located on <u>(Street Name, Road Number, etc.)</u>, <u>(in/near City or Town)</u>, in <u>(County Name)</u> County, West Virginia. The latitude and longitude coordinates are: <u>(Provide latitude and longitude in decimal format, NAD83 Decimal to 5 digits)</u>.

The applicant estimates the (<u>Increased</u>, <u>if modification application</u>) potential to discharge the following Regulated Air Pollutants will be: (<u>Pollutants and associated amounts in tons per year</u>).

Startup of operation is planned to begin on or about the (Day) day of (Month), (Year). Written comments will be received by the West Virginia Department of Environmental Protection, Division of Air Quality, 601 57th Street, SE, Charleston, WV 25304, for at least 30 calendar days from the date of publication of this notice.

Any questions regarding this permit application should be directed to the DAQ at (304) 926-0499, extension 1250, during normal business hours. Dated this the (Day) day of (Month), (Year).

By: (Applicant's Legal Name)
(Name of Responsible Official)
(Title of Responsible Official)
